Trans. of Sovetskaya Meditsina (USSR) 1962, v. 25,
no. 1, p. 145-147.

DESCRIPTORS: *Rheumatic diseases. Therapy.

The recurring forms of rheumatic chorea include re-
currences of choreic hyperkinesia resembling the
trace reactions that follow an episode of rheumatic
chorea. With a pseudorecurrence there are no signs
of exacerbation of the rheumatic process. Identifica-
tion of pseudorecurrences is of theoretical value in
understanding the pathogenesis of trace reactions. It
is also of practical value because they require special
anti-rheumatic treatment. The administration of
restoratives, sedatives, and soporifics is recommended
for pseudorecurrences of chorea. (Author)
